CAREER SUMMARY

Highly skilled UI UX Designer, with the proven knowledge to combine creative and usability viewpoints resulting in world-class web and mobile applications. I've worked on everything from branding and print layout to web design, frontend development, and UX process. I've taken the lead in the design of multiple projects ranging from public facing websites and mobile apps as well as internal applications across a wide range of industries.

This is twelve years' experience of creating inspiring, strategic and innovative ideas for all types of integrated digital solutions. Corporate, agency and start-ups environments gave me experience in consumer brand communication, managing business objectives, conducting and interpreting market research, coding, and cross-team collaboration. Around nine years of this experience have specifically been focused on producing pixel-perfect visuals and front-end development.
